III. Function Details

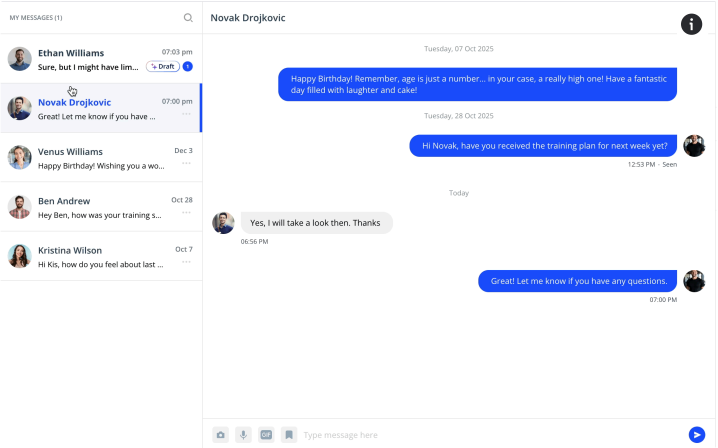
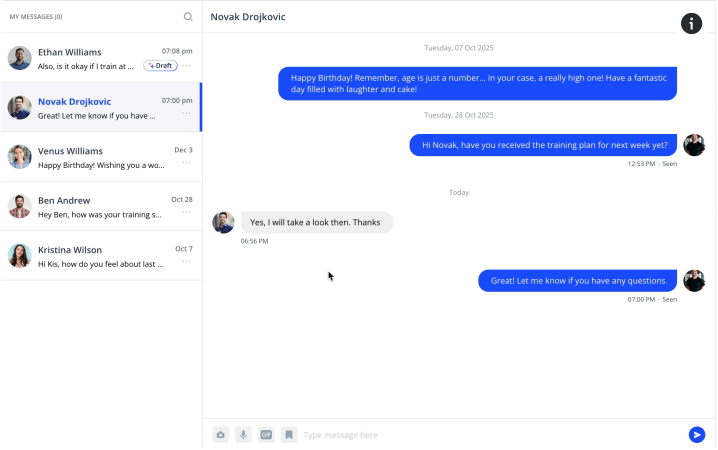
	Function	Description	Note
1	UI overview	1. Change to Admin convo mode. 2. Open AI setting for auto generate the message. 3. Broadcast: Send message to many clients. 4. Create new private chat or group chat. 5. Left side bar: List room chat. 6. Middle: Conversation view a. Header: Client name or group name. b. Conversation View: store chat history. c. Chat box and action send: i. Media ii. Voice chat iii. GIF iv. Saved response 7. Right panel: View and Edit the client profile (Note) or Group info (Name, Avatar, Search/Add/Remove clients to Group chat). 	

2	Admin convo	As an Owner, Admin, or Manager, you want to make sure your team delivers a consistent training quality to your clients during onboarding or customer support. We make it super easy to view your Coaches' inbox and conversations with their clients to help you with quality control. **Go to Inbox > Click on the dropdown > Choose the Coach you want to view the inbox** 	Admin Inbox: Access to your workspace's inbox | Everfit Help Center
3	AI setting (Smart response)	**Smart Responses** help you respond to client messages more efficiently by providing AI-generated draft replies based on the current chat context, giving you full control to review and edit before sending. **1/ How Smart Responses Work** Smart Responses can be generated in several situations: • **Scenario 1: For New (Unopened) Conversations** 1. **Auto-Generate:** Smart Response creates a draft reply as soon as a message arrives. 2. **Notification:** A **"Draft"** badge appears in your Inbox list. 3. **Auto-Fill:** Open the conversation to see the AI draft already filled in the **chat box**, ready to edit or send.	Smart Response (Beta Testing) | Everfit Help Center 



- **Scenario 2: While Actively Chatting**

1. **Trigger:** Smart Response drafts a reply for the first incoming message of an active session.
2. **Suggestion:** The draft appears as a preview above the **chat box**.
3. **Apply:** Click the draft to move it into the chat box and clear the suggestion.

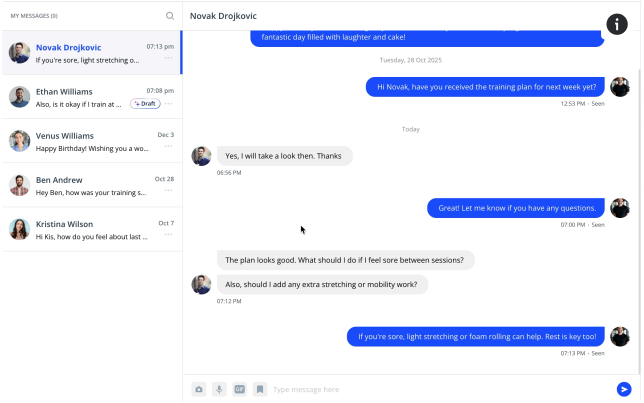


2/ Manually Generate a Smart Response

You can generate a Smart Response anytime for any **text message** from a client.

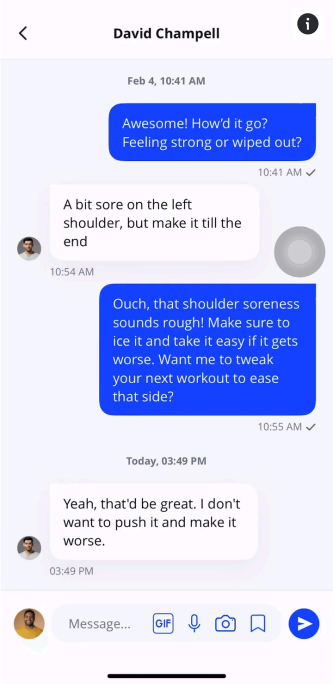
- **Web app**

1. Hover over a client's text message
2. Click **Reply with AI**
3. Wait for the draft to appear
4. Click the generated draft to insert it into the chat box, where it's ready for you to review, edit, and send

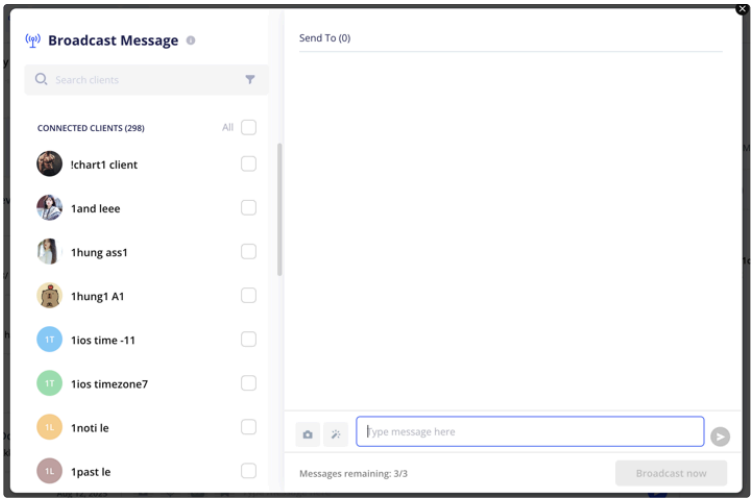


- **Mobile app**

1. Long-press a client message
2. Tap **Reply with AI**
3. Wait for the draft to generate
4. Tap the draft to insert it into the message box
5. Review, edit, and send



4	BroadCast	The broadcast message feature is exclusively available to **Studio plan users**, allowing coaches to effortlessly send messages to multiple clients simultaneously.	📖 Inbox: Broadcast Messages | Everfit Help Center • This functionality is accessible only with the Studio plan.

5	Create new chat - Group chat	The group chat functionality is specifically offered to all **Studio plan users**, enabling coaches and clients to maintain seamless communication and participate in real-time discussions on both web and mobile app interfaces. 	📖 Group Messaging | Everfit Help Center • Available on Studio plans only
6	Reply message	• On Web app: Hover over the message you want to respond to for the 'Reply' option to appear  • On mobile app: Select the message you want to respond to and either swipe left or press hold for the	📖 How to Reply to Inbox Messages | Everfit Help Center

		'Reply' option to appear 	
7	Mark as unread Archive room	If you would like to remind yourself to check back on a conversation, click on the "..." button and select ***Mark as unread*** either in the list of conversations, or the button at the top right corner of the selected conversation. You can archive a chat by clicking on the "..." button at the top right corner. Once a conversation is archived, you can always use the Compose option to look for the client and start chatting with them again. 	📖 Private Messaging | Everfit Help Center
8	Voice chat	• On web: you can click on the microphone icon to send voice messages to clients from the web app. • On mobile: From the Inbox of the coach app, you will see the microphone icon to send your client a voice message.	📖 How to Send Voice Messages | Everfit Help Center Turn off Voice Messages for specific clients

			Voice chat is enabled for all your clients by default. If you want to turn it off, you can head to the client's settings page on the web and uncheck the "Allow client to send voice messages" option under "Messages".
9	Save response	This feature helps coaches save frequently used messages and quickly reuse them in chats. Instead of typing the same replies over and over, you can insert a saved message with just a click or shortcut - saving time and keeping your communication consistent. **Web app** 1. Open a conversation in the Inbox 2. Click the **Saved Responses** button (or use the shortcut) 3. Select a saved response from the list 4. The full message will be inserted into your chat box, after any existing text 5. Edit the message if needed, then send 💡 You can also press **Enter** on a selected response to insert it quickly.  **Mobile app** 1. Open a conversation in the Inbox 2. Tap the **Saved Responses icon** in the chat input	📖 Saved Responses | Everfit Help Center • This feature is available on the **Pro plan and above**.

		3. Search or scroll to find the response you want 4. Tap the response to insert it into the message field 5. Edit if needed, then send
